Now a group of distinguished scholars (more than a hundred) have come together to demand answers to the many “distortions and omissions” of the official 9/11 Report that blames it all on “19 Suicide Hijackers,” (six of whom were found alive and well in Saudi Arabia, a fact omitted in the Report).

### **Sorry, can't do curfew**

I'm calling in response to the curfew that they would like to have in Jersey City. Although I agree that there should be a curfew, unfortunately it goes against your constitutional rights. I'm surprised that the chief of police even thought about having a curfew. I mean he's the chief of police, he should know something about the law. There is no such thing as a curfew. It does go against your constitutional rights, and that is the First Amendment. So I would just like to say, it's a good idea, but you can't do it.

### **Mosquito control great**

I want to thank the Hudson Regional Health Commission Mosquito Control for prompt service for a possible mosquito problem over at the former Wind City parking lot. We have called the Bayonne City Hall several time to no avail, but the Mosquito Control was down like they say in 24 hours. Thank you very much.
